## OBJECTIVE

Acquire a challenging and rewarding front-end web development position within a reputable organization where my skills are utilized collaboratively or independently to contribute to solid company growth while serving its clients interactive needs.

## SUMMARY

I am a highly motivated web developer with a design degree and a proven record of accomplishment building high-end enterprise websites and applications. Additionally, I have acquired a demonstrated history of producing award-winning responsive websites, which render consistently across ALL major modern browsers and small devices while degrading gracefully across all others.

As a front-end web developer, I work with HTML5, CSS2/3 and JavaScript while utilizing various libraries and frameworks to provide multiple levels of interactivity. In addition, I am forever committed to expanding my skillset with new technologies and learning new ways to build user interfaces and websites while maintaining strong adherence to W3C Principles, best practices and standards.
